

**Title: Letter from TNC IT GROUP**

**Subtitle: Important notice on Crypto merger process: Distribution, Coin Burn and TNC Staking information**

In November 2019, TNC successfully closed the first batch of mergers. In dealing with the first batch of mergers, the base swap rate was 1 billion TNC Coins per company. However, for the 2nd batch of merger companies, TNC introduced a new swap base rate of 100 million TNC Coins — significantly lower than 1st batch’s allocation.

With reference to given figures, 1 trillion TNC Coins will not be released to the market unconditionally. But will be released to the market in accordance to the merger process at a certain rate based on the merger stage. Evidently, the first five merger companies were given preferential treatment for trusting us in an early stage.

In short, as the merger program proceeds with the newest concept of Proof-of-Merger (POM), the TNC headquarters will also receive operational tokens at the same rate.

Once the 2nd merger is performed, 1 billion swaps would be adjusted to 100 million. Thus, the tokens with the difference in its total supply might be burned, as much as the number of the 2nd mergers. The tokens held by the foundation will be burned equally as much as the mentioned burned amount.

We at TNC will proceed with a new merger verification method, in which the tokens to be released in the market are adjusted according to the progress of the project. That said, we strive to complement the shortcomings of existing ICO companies and establish themselves as a more competitive system.

As mentioned before, as a result of these changes, preferential treatment will be given to the first five merger companies. In order to proceed with the project with the meaning of the start of the first merger, the users of the first five companies and the coins held by each company have a staking treaty rather than incineration, so that the difference from other companies is to be made.

Rather than no proceeding with the incineration of the currently granted TNC Coins, we intend to borrow a system of Proof of Stake that supports annual interest of 20% for the amount of coins that are staked for on year and staked monthly.

Therefore, we aim to prevent the market overload and maintain fairness with 2nd and 3rd batch of mergers. TNC, which has now migrated to its mainnet coin, is ready to be adopted through exchanges and the novel Real Research platform.

After 2 years of long preparation for this project, we are now trying to bring blockchain technology to the world as a truly decentralized system. We are currently preparing for listing with exchanges quickly, so look forward to it.

	Actual amount	10,000	11,800	13,600	15,400	17,200	19,000	20,800	22,600	24,400	26,200	18,000	16,200	104,400	102,600	100,800	99,000	97,200	95,400	93,600	91,800	90,000	90,000

According to above chart, the coins of users who have staked are paid sequentially after 12 months and receive annual interest of 20% every month. 90% of staking is paid interest, and 10% of unlocked coins and interest can be transferred directly to the exchange.
